PROJECTS

Energy Consumption Project — *A St. John's University Project*
A energy consumption analysis project using energy company's price, and the weather detail from weather forecast to location trends and reasons behind price change to get the most out of your money, and save on your energy bill.

Personal Website — *My first webpage, a website about me*
http://www.wongandy.com is my first website that I created from scratch without Wordpress, Wix or similar companies. I used HTML & CSS, and the website's future will use PHP and JavaScript.
